

AUDIT REPORT: BITCOIN

VERDICT: High Risk (Score: 70/100)

Executive Summary

Bitcoin's low liquidity ratio and lack of transparency in its development team raise concerns. While it has a fixed supply cap, the risk of market manipulation and potential rug pull cannot be ruled out. Further investigation is needed to determine the full extent of these risks.

Pros (Strengths)

- + Fixed supply cap
- + Decentralized peer-to-peer network

Cons (Risks)

- Low liquidity ratio
- Anonymous development team raises concerns about potential rug pull
